

# When You Receive Your Pathology Results

---

- What type of skin cancer do I have ?
- Are there any high-risk or aggressive features that I should know about?
- Did the biopsy remove all of the skin cancer?
- How will I know if my cancer has spread?
- Will I require surgery? If so, what type?
- What are the treatment options? What are the pluses and minuses of each type?

## Pathology Report

(puh-THAH-loh-jee ...)

The description of cells and tissues made by a pathologist based on microscopic evidence, and sometimes used to make a diagnosis of a disease.
