

# At Your Surgical Follow-up

---

- Are we confident that all of the cancer is out with a sufficient “margin” of clear skin around it?
- If not, are you going to perform another surgery? Are there any other procedures that I need?
- Has my cancer spread?
- What additional treatment, if any, will I need?
- If I need to see any additional specialists, whom do you recommend?

## TIP

Follow your doctor's post-op instructions. When you are discharged, your physician will provide specific instructions for the hours, days, and weeks after your procedure.
